

## **EDITORIAL NOTE**

# **GREETINGS FROM THE NEW EDITOR-IN-CHIEF**

Rafał LEWKOWICZ

Editor-in-Chief, The Polish Journal of Aviation Medicine, Bioengineering and Psychology, Military Institute of Aviation Medicine, Warsaw, Poland

**Source of support:** Own sources

**Author's address:** R. Lewkowicz, Military Institute of Aviation Medicine, Krasieńskiego Street 54/56, 01-755 Warsaw, e-mail: rlewkowicz@wiml.waw.pl

The current issue of the Polish Journal of Aviation Medicine, Bioengineering and Psychology (PJAMBP) is the first edition overseen by a new editorial team, with Dr. Rafał Lewkowicz taking over as the Editor-in-Chief. I am deeply honored to have been entrusted with these positions and am enthusiastic about my participation in furthering the journal's enduring achievements.

I express my gratitude to the former Editor-in-Chief, Dr. Stefan Gaździński, who currently takes on the role of Deputy Editor, for his smooth passing of responsibilities. I also extend my appreciation to the boards and members of the Polish Aviation Medicine Society for their invaluable support. I want to convey my heartfelt thanks to the Associate Editors, the Editorial Board, and all the reviewers who are joining us on this ongoing journey.

The journal's strength lies in bridging the gap between sound scientific research and practical application, something we aim to expand in the coming years. Our ongoing commitment to enhancing aviation safety is based on applying rigorous scientific principles to address both current and emerging challenges in our industry.

In the realm of scientific research, our pursuit entails striving for the best research design, rigor in execution, precise analysis, and innovative problem-solving. With our guidance, supported by Associate Editors and reviewers, we endeavor to ensure that every publication in PJAMBP showcases the utmost scientific excellence in our field. Our aim is to ensure that all published research in PJAMPB offers clear guidance for instigating substantial and positive changes, thus sustaining aviation as an exceptionally safe mode of transportation. In the upcoming issues, we plan to enhance the journal by providing improved author guidelines and declarations of authors' interests. Additionally, we aim to increase the journal's

indexing and elevate its status in terms of quality and impact within our field. At the same time, we will invite contributions from PhD students and early-career researchers.

We are actively looking to expand our group of reviewers for the journal and welcome reviewer nominations and suggestions at the following email address: [pjambp@wiml.waw.pl](mailto:pjambp@wiml.waw.pl).
